

MESURE YOUR WRIST SIZE

HOW TO PRINT YOUR BRACELET

Before printing, make sure that your printing options state that you are printing in the **A4** format. If the "scale to paper" box is ticked, make sure to untick it, as it will alter the scale of the printing, and therefore your wrist size.

To be completely sure of the scale of the paper, you can check the paper bracelet scale with a ruler.

HOW TO USE YOUR BRACELET

Once you have printed this document, safely cut out the black paper bracelet located on the right side of this document. Then make a small cut where there are dotted lines with the inscription "cut here".

Put the bracelet on your wrist, with the logo side showing. Then simply go around your wrist with the bracelet and pass it through the cut made earlier.

Be sure to make the bracelet as tight (or loose) as you wear your timepieces. Once you are ready, the size will be indicated by the cut level of the bracelet.
